SUMMARY

Backend Developer with hands-on experience building REST APIs using Java 17 and Spring Boot. Currently working as a Software Apprentice at Molex, where I independently designed and delivered two full backend systems from scratch. Skilled in JWT-based authentication, Spring Security, JPA/Hibernate, and relational databases. Passionate about clean architecture, scalable systems, and continuously exploring AI-integrated tooling.

EXPERIENCE

Software Apprentice

Aug 2025 – Present

Molex

Bengaluru, India

- Designed and developed **ClaimX**, a multi-role expense reimbursement platform supporting Employee, Manager, Finance, and Admin workflows.
- Built the entire backend independently using **Java 17** and **Spring Boot**, including a MySQL schema with 5 tables and **24 REST APIs** covering the full claim lifecycle.
- Implemented **JWT-based authentication** and role-based authorization using **Spring AOP**; documented all APIs with **Swagger** and tested via **Postman**.
- Built **Orbit**, a structured onboarding platform enabling new employees to navigate training modules and track learning progress, with admin-level completion summaries.
- Developed using **Spring Security with JWT**, **PostgreSQL**, and **JPA/Hibernate** with full role-based access for User and Admin.

PROJECTS

ClaimX | *Java 17, Spring Boot, PostgreSQL, JWT, Spring AOP, Swagger, Postman*

Molex – Internal

- Multi-role expense reimbursement platform with complete claim lifecycle management across 4 roles: Employee, Manager, Finance, and Admin.
- Independently designed a 5-table MySQL schema and built 24 REST APIs; secured with JWT tokens and AOP-driven role-based authorization.

Orbit – Onboarding Platform | *Java 17, Spring Boot, PostgreSQL, Spring Security*

Molex – Internal

- Onboarding platform for new employees to complete structured training modules and track progress through knowledge articles.
- Admin dashboard aggregates completion data across all users; entire backend built independently with JWT-secured endpoints.

Dependency Health Navigator | *Claude CLI, AI Prompting, Dashboard*

Ai Hackathon

- Built a dashboard to visualize dependency relationships between microservices and packages, highlighting version conflicts and the downstream impact of upgrades.
- Developed end-to-end using **Claude CLI** with AI-driven prompting to analyze and surface dependency health insights.

TECHNICAL SKILLS

Languages: Java 17, SQL

Frameworks & Libraries: Spring Boot, Spring Security, Spring AOP, JPA/Hibernate

Databases: PostgreSQL

Tools & Platforms: Git, Postman, Swagger, Firebase, IntelliJ IDEA, VS Code

Concepts: REST API Design, JWT Authentication, Role-Based Access Control, OOP, DBMS, Software Engineering

AI & Others: Gemini API, Claude CLI

EDUCATION

NMIT, Bengaluru

Aug 2021 – Jun 2025

B.E. in Computer Science Engineering

CGPA: 8.7

St. Mary's PU College

Jun 2019 – May 2021

Pre-University (PCMCs)

97.83%

Poorna Prajna High School

May 2018 – Apr 2019

Class X

96.16%
