SUMMARY

Java Backend Developer with hands-on experience designing and building REST APIs using Java 17 and Spring Boot. Currently working as a Software Apprentice at Molex, where I designed and delivered full backend systems. Skilled in JWT authentication, Spring Security, JPA, and PostgreSQL. Passionate about clean architecture, scalable systems, and actively exploring AI-integrated backend tooling.

EXPERIENCE

Software Apprentice

Aug 2025 – Present

Molex

Bengaluru, India

- Designed and developed **ClaimX**, a multi-role expense reimbursement platform supporting Employee, Manager, Finance, and Admin workflows, built entirely from scratch.
- Built the complete backend using **Java 17** and **Spring Boot**, including a PostgreSQL schema with 5 tables and **24 REST APIs** covering the full claim lifecycle.
- Designed and developed **Orbit**, a centralized onboarding and knowledge management platform with **16 REST APIs** and 4 relational tables, supporting structured module-based learning for new joiners.
- Explored the **mPACT2WO** industrial IoT platform covering emissions and corrosion monitoring systems, gaining domain context on how backend services operate in industrial environments.

PROJECTS

ClaimX | *Java 17, Spring Boot, PostgreSQL, JWT, Spring AOP, Swagger, Postman*

Molex – Internal

- Multi-role expense reimbursement platform with complete claim lifecycle management across 4 roles: Employee, Manager, Finance, and Admin.
- Designed a 5-table PostgreSQL schema (Users, Employee-Manager Mapping, Claims, Claim Items, Audit Log) and built **24 REST APIs** covering creation, approval, payment, and admin oversight.
- Secured all endpoints with JWT-based stateless authentication and AOP-driven role-based authorization; real-time claim status visible to users across all workflow stages.

Orbit | *Java 17, Spring Boot, PostgreSQL, Spring Security, JPA/Hibernate, Swagger*

Molex – Internal

- Centralized onboarding platform enabling new employees to access training modules, read knowledge articles, and track completion progress with dynamically calculated progress percentage.
- Designed a 4-table PostgreSQL schema (Users, Training Modules, Knowledge Articles, Module Progress) and built **16 REST APIs**; Admin manages content lifecycle while Users complete modules with idempotent progress tracking.

Dependency Health Navigator | *Claude CLI, AI Prompting, Dashboard*

AI Hackathon

- Built a dashboard to visualize dependency relationships between microservices and packages, detecting version conflicts and surfacing the downstream impact of upgrades.
- Developed end-to-end using **Claude CLI** with agentic AI prompting, demonstrating practical AI tooling and prompt engineering skills.

TECHNICAL SKILLS

Languages: Java 17, SQL

Frameworks & Libraries: Spring Boot, Spring Security, Spring AOP, JPA/Hibernate, Lombok, MapStruct

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, Postman, Swagger, IntelliJ IDEA, VS Code, pgAdmin, JUnit 5, Mockito

Concepts: REST API Design, JWT Authentication, Role-Based Access Control, OOP, Unit Testing, API Documentation, DBMS

AI & Others: Gemini API, Claude CLI, Claude Skills, MCP

EDUCATION

NMIT, Bengaluru

Aug 2021 – Jun 2025

B.E. in Computer Science Engineering

CGPA: 8.7

St. Mary's PU College

Jun 2019 – May 2021

Pre-University (PCMCs)

97.83%

Poorna Prajna High School

May 2018 – Apr 2019

Class X

96.16%
