PROJECTS

Sales Insights Report

Data Analytics Project

- Designed a Power BI dashboard to understand AtliQ hardware goods sales trends.
- The final dashboard effectively displayed sales trends of AtliQ hardware, aiding data-driven decision-making.

Car Resale Price Prediction

Data Science Project

- Analyzed a dataset of used cars to predict resale prices. Cleaned and visualized data using Pandas and Matplotlib, identifying patterns and correlations for modeling.
- Utilized machine learning techniques to build a predictive model, providing a data-driven approach for accurate price estimation.

Real-Time Chat Application

Web Development Project

- Developed a real-time chat application for seamless, bidirectional communication between clients and the server.
- Enabled instant message exchange, event synchronization, and support for multiple users interacting simultaneously.
