SUMMARY

Java Backend Developer with hands-on experience designing and building REST APIs using Java 17 and Spring Boot. Currently working as a Software Apprentice at Molex, where I independently designed and delivered a full backend system. Skilled in JWT-based authentication, Spring Security, JPA/Hibernate, and relational databases. Passionate about clean architecture, scalable systems, and actively exploring AI-integrated backend tooling.

EXPERIENCE

Software Apprentice

Aug 2025 – Present

Molex

Bengaluru, India

- Designed and developed **ClaimX**, a multi-role expense reimbursement platform supporting Employee, Manager, Finance, and Admin workflows entirely from scratch.
- Built the complete backend independently using **Java 17** and **Spring Boot**, including a **PostgreSQL** schema with 5 tables and **24 REST APIs** covering the full claim lifecycle.
- Implemented **JWT-based stateless authentication** and role-based authorization using **Spring AOP**; documented all APIs with **Swagger** and validated via **Postman**.
- Gained exposure to **IIoT-based industrial monitoring systems** (emissions and corrosion detection) as part of team onboarding within the mPACT2WO product division.

PROJECTS

ClaimX | *Java 17, Spring Boot, PostgreSQL, JWT, Spring AOP, Swagger, Postman*

Molex – Internal

- Multi-role expense reimbursement platform with complete claim lifecycle management across 4 roles: Employee, Manager, Finance, and Admin.
- Independently designed a **5-table PostgreSQL schema** (Users, Employee-Manager Mapping, Claims, Claim Items, Audit Log) and built **24 REST APIs** covering creation, approval, payment, and admin oversight.
- Secured all endpoints with **JWT-based stateless authentication** and **AOP-driven role-based authorization**; real-time claim status visible to users across all workflow stages.

Orbit- a smart onboarding assistant | *Firebase, Gemini API, Chatbot*

AI Hackathon – 1 Month

- Built during an AI hackathon – a web-based onboarding assistant featuring a **Gemini API-powered chatbot** connected to a company knowledge base for context-aware responses.
- Delivered a personalized dashboard, intelligent chatbot, and a knowledge transfer hub with documents to streamline new joiner onboarding experience.
- Integrated **Firebase** as the backend for real-time data storage and user authentication.

Dependency Health Navigator | *Claude CLI, AI Prompting*

AI Hackathon

- Built a dashboard to visualize dependency relationships between microservices and packages, detecting **version conflicts** and surfacing the downstream impact of upgrades.
- Developed end-to-end using **Claude CLI** with agentic AI prompting, demonstrating practical AI tooling and prompt engineering skills.

TECHNICAL SKILLS

Languages: Java 17, SQL

Frameworks & Libraries: Spring Boot, Spring Security, Spring AOP, JPA/Hibernate, Lombok, MapStruct

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, Postman, Swagger, IntelliJ IDEA, VS Code, pgAdmin, JUnit 5, Mockito

Concepts: REST API Design, JWT Authentication, Role-Based Access Control, OOP, Unit Testing, API Documentation, DBMS

AI & Others: Gemini API, Claude CLI, Claude Skills, MCP

EDUCATION

NMIT, Bengaluru

Aug 2021 – Jun 2025

B.E. in Computer Science Engineering

CGPA: 8.7

St. Mary's PU College

Jun 2019 – May 2021

Pre-University (PCMCs)

97.83%

Poorna Prajna High School

May 2018 – Apr 2019

Class X

96.16%
